May 2023 press release

## Reliability in solar METZ launches photovoltaics line

**Zirndorf, 26 May 2023**

Metz is one of the longest-standing German consumer electronics companies. With the highest standards, sophisticated innovations and outstanding service, Metz still stands for the traditional values of a German brand that sets the standard for the best quality. In 2023, the company is entering the photovoltaics sector in Germany together with its Chinese parent company SKYWORTH.

Metz is now entering the photovoltaics sector in Germany together with its Chinese parent company SKYWORTH. As one of the longest-standing German consumer electronics companies, Metz has made a name for itself with the highest quality standards, outstanding service and trustworthy customer management.

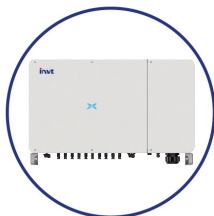

### Reliable distribution

The company is also applying these values to its photovoltaics business and, as a distribution partner for numerous Tier 1 suppliers, offers a high-performance portfolio of inverters, battery storage systems and solar modules for the private sector as well as for industrial and ground-mounted systems. It ensures reliable delivery to its customers by means of various European warehouses, guaranteeing the highest level of planning certainty. A German service centre with experienced German-speaking technicians is on hand to support customers from the trade and installation sectors.

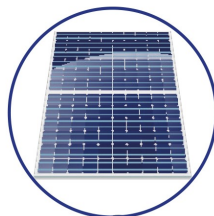

“As a traditional German company, reliability, predictability and service orientation are values that we apply to our new photovoltaics business and by which we intend to be judged. The successful implementation of the first reference projects proves convincingly that Metz is also a company you can count on in the photovoltaic sector,” says Dr Norbert Kotzbauer, CEO of Metz Consumer Electronics GmbH.

## Certified hardware

All products from Metz's photovoltaic range comply with the international IEC standards. These include VDE-compliant string and hybrid inverters with TÜV certification for use in private and large-scale systems, solar modules from renowned Tier 1 manufacturers, and high-performance battery storage solutions. All products are available directly ex warehouse in Germany and Europe.

## Quality and service from a single source

"In addition, we have established a service centre that allows us to apply our service consciousness as a traditional German company to the PV industry," adds Dr Kotzbauer. "Staffed by German specialists, we are on hand to provide everything from web-based remote maintenance and ticketing services to replacement services in the event of a defect for our installation and trade customers."
